EXAM PAPERS PLUS

11+ Kingston

Practice Test 8
English

50 minutes
100 marks

- *This is a multiple-choice test paper. Mark your answer to each question on the separate answer sheet.*
- *Draw a firm line clearly through the letter that represents the correct answer. If you make a mistake, rub it out as completely as you can and mark your new answer.*
- *Be sure to keep your place on the answer sheet. Mark your answer in the box that has the same number as the question on this test paper.*
- *If you are not sure of an answer, choose the one you think is best.*
- *Read the instructions carefully before beginning each section.*
- *Work as quickly and as carefully as you can.*

NB: The parent or tutor administering this test should provide a time reminder at the halfway point and when 5 minutes remain.

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

The passage below is taken from *General Science*, by Bertha M. Clark. Ten words have been removed. Choose the **best** word from the list to go in each numbered space and mark its letter on your answer sheet. Each word can be used only once.

A	**liquid**	**F**	**contracts**
B	**narrow**	**G**	**taut**
C	**observation**	**H**	**expansion**
D	**sag**	**I**	**subject**
E	**resuming**	**J**	**forces**

The **(1)** of water can be easily shown by heating a flask filled with water and closed by a cork through which a **(2)** tube passes. As the water is heated, it expands and **(3)** its way up the tube. If the heat is removed, the **(4)** cools, **(5)**, and slowly falls in the tube, **(6)** in time its original size or volume. A similar **(7)** can be made with alcohol, mercury, or any other convenient liquid.

Not only liquids are affected by heat and cold, but solids are also **(8)** to similar changes. A metal ball which when cool will just slip through a ring will, when heated, be too large to slip through the ring. Telegraph and telephone wires which in winter are stretched **(9)** from pole to pole, **(10)** in hot weather and are much too long.

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

The passage below is taken from *The Sign of the Four*, by Arthur Conan Doyle. The paragraphs labelled **A–F** are in the wrong order. Put them into the **correct** order.

A	There was a grumbling sound and a clanking and jarring of keys. The door swung heavily back, and a short, deep-chested man stood in the opening, with the yellow light of the lantern shining upon his protruded face and twinkling, distrustful eyes.

B	Pondicherry Lodge stood in its own grounds, and was girt round with a very high stone wall topped with broken glass. A single, narrow, iron-clamped door formed the only means of entrance. On this our guide knocked with a peculiar postman-like rat-tat.

C	It was nearly eleven o'clock when we reached this final stage of our night's adventures. We had left the damp fog of the great city behind us, and the night was fairly fine. A warm wind blew from the westward, and heavy clouds moved slowly across the sky, with half a moon peeping occasionally through the rifts. It was clear enough to see for some distance, but Thaddeus Sholto took down one of the side-lamps from the carriage to give us a better light upon our way.

D	"It is I, McMurdo. You surely know my knock by this time."

E	"That you, Mr Thaddeus? But who are the others? I had no orders about them from the master."

F	"Who is there?" cried a gruff voice from within.

11 Mark the letter of the paragraph that should come **first**.

12 Mark the letter of the paragraph that should come **second**.

13 Mark the letter of the paragraph that should come **third**.

14 Mark the letter of the paragraph that should come **fourth**.

15 Mark the letter of the paragraph that should come **fifth**.

16 Mark the letter of the paragraph that should come **last**.

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

Read this passage carefully and then answer the questions that follow.

An Historical Narrative of the Great and Terrible Fire of London, Sept. 2nd 1966

by Gideon Harvey

The Great Fire of London took place in 1666. The fire started at a bakery on 2nd September and lasted for three days.

It began in the dead of the night, and the darkness very much increased the confusion and horror of the surprising calamity: when it had made havoc of some houses, it rushed down the hill towards the bridge; crossed Thames Street, invaded St. Magnus church at the bridge foot, and though that church was so great, yet it was not a sufficient barricade against this merciless conqueror; but having scaled and taken this fort, it shot flames with so much greater advantage into all places round about, and a great building of houses is quickly thrown down to the ground; there, being stayed in its course at the bridge, the fire marched back through the city again, and ran along, with great noise and violence, through Thames Street, westward, where, having such combustible matter to feed on, and such a fierce wind upon its back, it prevailed with little resistance, unto the astonishment of the beholders. The fire is soon taken notice of, though in the midst of the night: Fire! Fire! Fire! doth resound through the streets; many start out of their sleep, look out of their windows; some dress themselves and run to the place. The citizens affrighted and amazed, delayed the use of timely remedies; and what added to the misfortune, was, the people neglecting their houses, and being so fatally set on the hasty removing of their goods, which were, notwithstanding, devoured by the nimble increase of the flames. A raging east wind provoked it to an incredible degree, and in a moment raised the fire from the bottoms to the tops of the houses, and scattered prodigious flakes in all places, which were mounted so vastly high in the air, as if heaven and earth were threatened with the same conflagration. The fury soon became insuperable against the arts of men and power of engines; and besides the dismal scenes of flames, ruin and desolation, there appeared the most killing sight in the distracted looks of the citizens, the wailings of miserable women, the cries of poor children, and decrepit old people; with all the marks of confusion and despair. No man that had the sense of human miseries could unconcernedly behold the dismal ravage and destruction made in one of the noblest cities in the world.

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

The lord mayor of the city comes with his officers; what a confusion there is! — counsel is taken away; and London, so famous for wisdom and dexterity, can now find neither brains nor hands to prevent its ruin: the decree was gone forth, London must now fall: and who can prevent it? No wonder, when so many pillars are removed, the building tumbles. The fire gets the mastery, and burns dreadfully, by the force of the wind; it spreads quickly; and goes on with such force and rage, overturning all so furiously, that the whole city is brought into jeopardy and confusion.

Answer the questions below. Look at the passage again if you need to.
You should choose the **best** answer and mark its letter on your answer sheet.

17 **What is meant by 'the dead of the night'? (line 1)**

A early evening
B the middle of the night
C just before daylight

18 **'it rushed down the hill towards the bridge' (line 3)**

Which language technique is being used here?

D hyperbole
E a simile
F alliteration
G personification

19 **What does 'merciless conqueror' (lines 5–6) refer to?**

H the bridge
I the church
J the river
K the fire

20 **Why did the citizens delay 'the use of timely remedies' (line 16)?**

L They were too tired to react.
M They were in shock.
N They thought the fire would not last long.

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

21 **What impact did the wind have upon the fire?**

O It did not make much difference.
P It cooled the flames down and stopped them spreading.
Q It put some flames out.
R It made the fire spread and burn more rapidly.

22 **The use of the words 'devoured' (line 18), 'provoked' (line 19) and 'fury' (line 23) create what image of the fire?**

S it being a troublesome toddler
T it being a ferocious dog
U it being a wild cat
V it being a hungry and out-of-control beast
W it being an alien on a mission

23 **'Fire! Fire! Fire!' (line 13)**

What emotion does this repetition convey?

A panic
B sadness
C anger
D irritation
E paranoia

24 **Which one of the following statements is not true?**

F The author considered the fire to be a catastrophic event for London.
G The extract is from a fiction book.
H People lost their homes in the fire.

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

25 **What is 'the building' (line 34) a metaphor for?**

I the counsel
J London
K the mayor
L a house
M the fire

The passage below is taken from *General Science*, by Bertha M. Clark.
Read it carefully and then answer the questions that follow.

The heat of the sun causes constant evaporation of the waters of oceans, rivers, streams, and marshes, and the water vapour set free by evaporation passes into the air, which becomes charged with vapour or is said to be humid. Constant, unceasing evaporation of our lakes, streams, and pools would mean a steady decrease in the supply of water available for daily use, if the escaped water were all retained by the atmosphere and lost to the earth. But although the escaped vapour mingles with the atmosphere, hovering near the earth's surface, or rising far above the level of the mountains, it does not remain there permanently. When this vapour meets a cold wind or is chilled in any way, condensation takes place, and a mass of tiny drops of water or of small particles of snow is formed. When these drops or particles become large enough, they fall to the earth as rain or snow, and in this way the earth is compensated for the great loss of moisture due to evaporation. Fog is formed when vapour condenses near the surface of the earth, and when the drops are so small that they do not fall but hover in the air, the fog is said "not to lift" or "not to clear".

Answer the questions by choosing the **best** answer.
Look at the passage again if you need to

76 **When are rivers likely to lose the most amount of water through evaporation?**

A in the spring
B in the summer
C in the autumn
D in the winter

77 **Which one of the following statements is true?**

E All water vapour stays in the atmosphere.
F Water vapour always falls as rain.
G Fog is made up of tiny water droplets.
H The water in streams is steadily decreasing each day.

78 **What causes the water vapour to condense?**

I heavy clouds
J particles of snow
K loss of moisture
L a drop in temperature

12 A coordinate grid is made up of squares of side length 1 cm.
The centre of a circle is at (2, 2).

If the diameter of the circle is 16 cm, which one of the following is a point on the circumference of the circle?

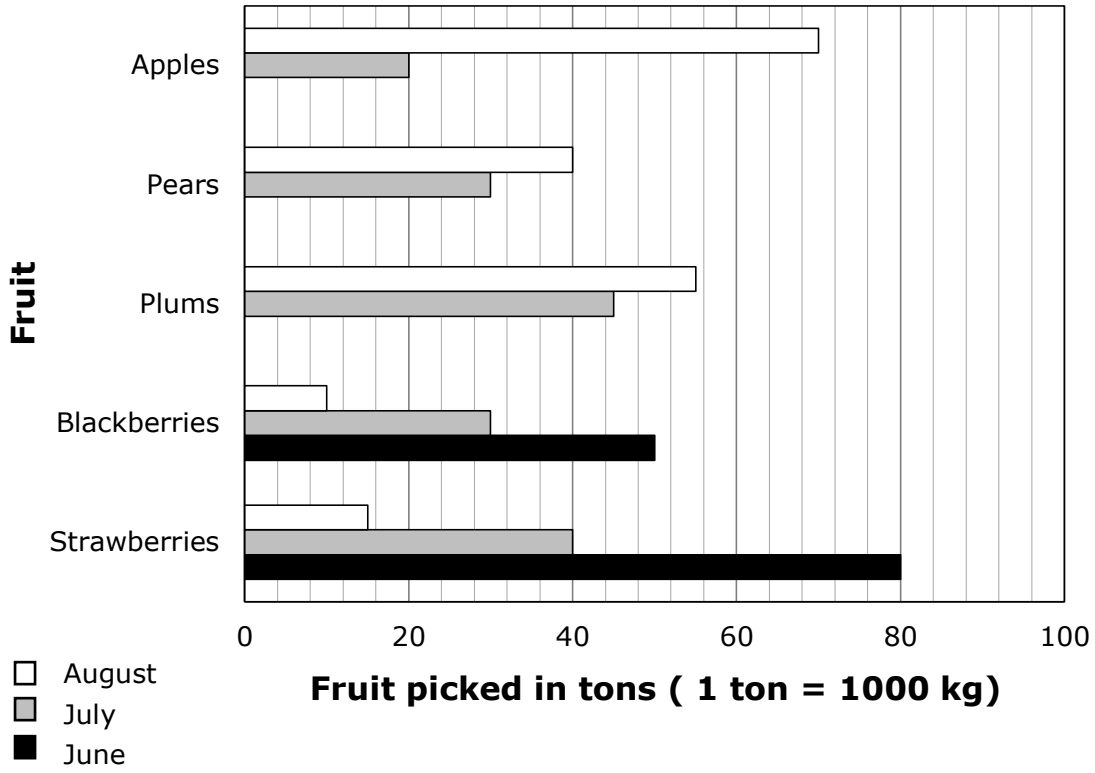

F (10, 2)
G (18, 2)
H (0, 6)
I (0, 16)
J (4, –14)

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

13 A whale weighs 120 000 kg plus a quarter of its weight.

How much does the whale weigh in tons?
1 ton = 1000 kg

14 The chart shows the total amount of fruit picked at Fruit Farm during the summer months.

How many more kg of strawberries were picked in August than blackberries?

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

15 What number is halfway between –38 and 132?

16 Derek has written 4 clues in case he forgets his 4-digit code:

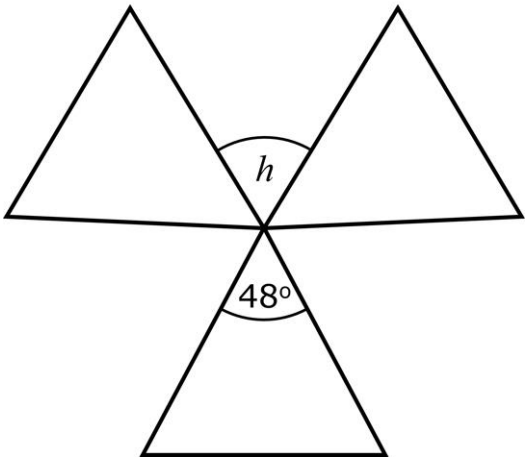

- There is one odd number.
- Two of the digits are identical and are in the first and last place.
- The sum of the digits is 9 and there is only one 0.
- The code is divisible by 8.

What is Derek's 4-digit code?

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

17 The following diagram is made up of three identical isosceles triangles, which are evenly spaced.

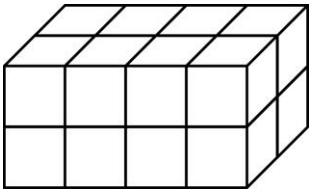

Not to scale.

What is the size, in degrees, of angle h?

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

18 Carl has 50 cubes of volume 1 cm^3.
Carl makes the following cuboid and then makes the largest cube possible with the remaining cubes.

How many cubes does Carl have left over?

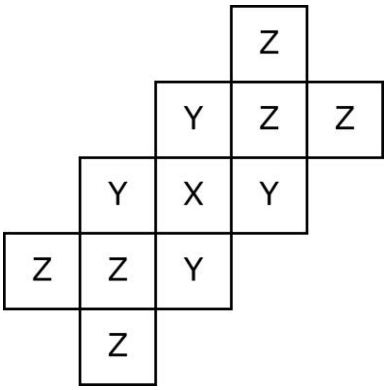

19 Priya plants watercress seeds.
The number of new seedlings that appear each day is 4 more than the previous day.
On Day 6, there are 84 seedlings growing.

How many seedlings appeared on Day 1?

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

20 What is 300% of 71?

21 Starting at X, move diagonally, horizontally or vertically to spell out XYZ.

How many different ways can you move from X to Y to Z?

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

22 Mr West travels from London to Cardiff by car.
He leaves at 11 a.m. and travels at an average speed of 80 kilometres per hour without stopping.

If Mr West arrives at his destination at 2.20 p.m., how far did Mr West travel to the nearest km?

23 What is 30 ÷ 0.01?

24 Two years ago, the total of the ages of the children in a class was 120.
Currently, the total of the ages of the same children is 150.

If the same children remain in the class, what will be the total of their ages be in 3 years' time?

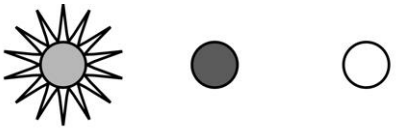

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

25 If $4j - 5 = j + 4$, what is the value of $23 - (7 - j)$?

Three lights flash during a firework display in the following order:
red, blue, white, blue, red, blue, white, blue, etc. (or RBWBRBWB…)

This information relates to questions 26–28.

26 If the red light flashes first, how many times will the red light have flashed when 200 flashes have occurred?

27 If there is half a second between each flash, how many flashes will there be during the 10-minute firework display?

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

28 The next day, the setting is changed so that the lights will flash in the order: RBRWRBRW…

There is still half a second between flashes.

How many more red flashes than blue flashes will there have been after 2 minutes of the lights flashing?

29 Using 4 out of the 6 digits: 1, 2, 3, 6, 7 and 8, what is the nearest number to 5000 that can be formed?

30 How many times smaller is 4 than 4^4?

31 What is 40% of 80% of 50% of 1600?

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

32 I think of a number.
I multiply it by 1.5 and then add 3.
The answer is 63.

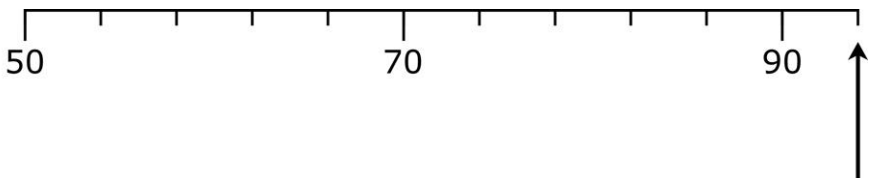

What was my original number?

33 What is the area of the shape, in unit squares, formed when the points at coordinates (–4, –2), (–2, 2), (1, 2) and (3, –2) are joined?

34 What is the difference between $(1 + 2 + 3 + 4)^2$ and $1^2 + 2^2 + 3^2 + 4^2$?

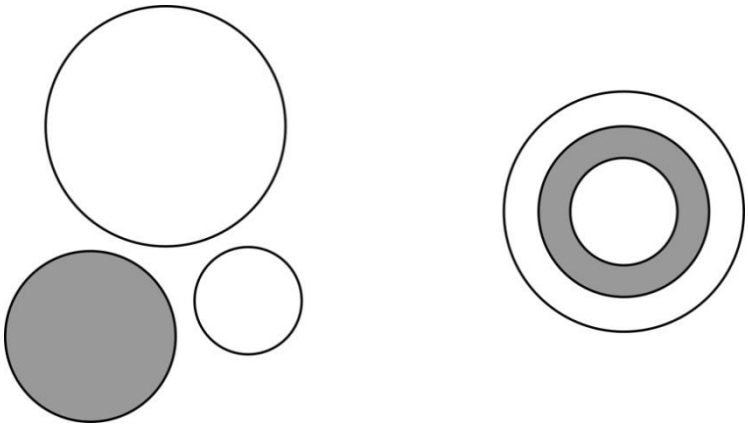

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

35 Look at the number line below:

To what number is the arrow pointing?

36 Three circles are placed centrally on top of each other, as shown.
The largest circle has an area of 10 cm².
The grey circle has an area of 5 cm².
The smallest circle has an area of 2 cm².

What proportion, as a decimal number, of the shape formed is shaded grey?

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

37 $W = 4r + (r - 2)^3 - 22 \div t$

What is the value of W when $r = 5$ and $t = 11$?

38 Fridge magnets cost 85 p.
Adam calculates that he can purchase 4 fridge magnets and still have the exact money left to buy 2 packets of crisps.

If one packet of crisps costs 35 p, how much money does Adam have in pounds and pence?

39 Jay draws a cuboid.
The height is twice the length and the length is twice the width.
Each side measures a whole number of cm and the volume of the cuboid is 216 cm^3.

What is the area, in cm^2, of the smallest face of the cuboid?

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

The following table shows the input and output of a function machine:

Input	Output
4	14
5	17
10	32
12	38
15	47

The table relates to questions 40–41.

40 What is the output if the input is 98?

41 What is the input if the output is 98?

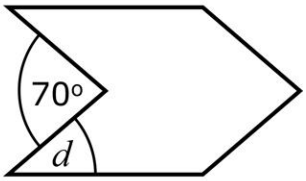

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

42 If 1st September is a Saturday, how many days later than 1st September of the next year is the first Thursday in September?
Assume it is not a leap year.

43 Mr Opus and Mr Sloth painted a house in 3 days.
If Mr Opus had painted the house on his own, he would have been able to finish the job in 4 days.

How long would Mr Sloth take to paint the house if he painted it on his own?

44 The arrow has a horizontal line of symmetry.

What is the size, in degrees, of angle d?

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

45 A pack of 10 pencils costs £3.00.
A pack of 20 pencils costs £5.00.
A pack of 50 pencils costs £10.00.
A pack of 80 pencils costs £14.40

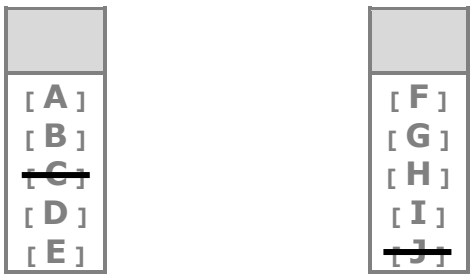

What is the least amount of money, in pounds and pence, needed to buy at minimum of 180 pencils?

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

11+ Kingston – Practice Test 8 – Answer Sheets

English Practice Test

Please mark boxes with a thin horizontal like this:

In the first example, on the left, the answer selected is C.

In the second example, on the right, the answer selected is J.

A line is drawn through the letter. It may go outside the brackets, but MUST NOT cross the outer border of the box.

Maths Practice Test

For multiple-choice questions, please mark boxes in the same way as shown above.

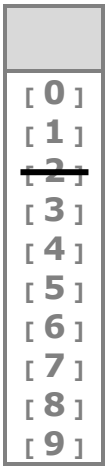

For questions that require numerical answers, there will be columns that represent units, tens, hundreds and thousands.

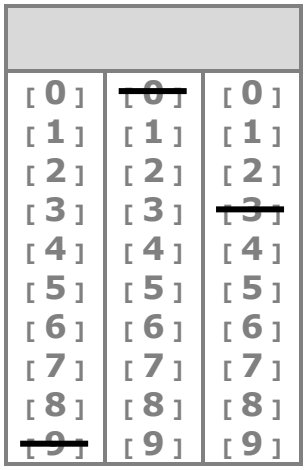

For a single-digit answer, there will be one column on the answer sheet in which to record your answer.

For a 2-digit answer, there will be two columns on the answer sheet.

For a 3-digit answer, there will be three columns on the answer sheet, and so on.

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.

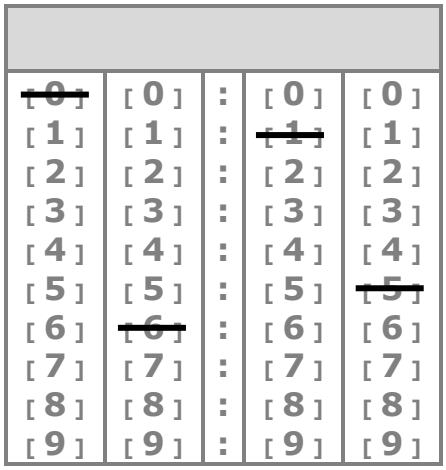

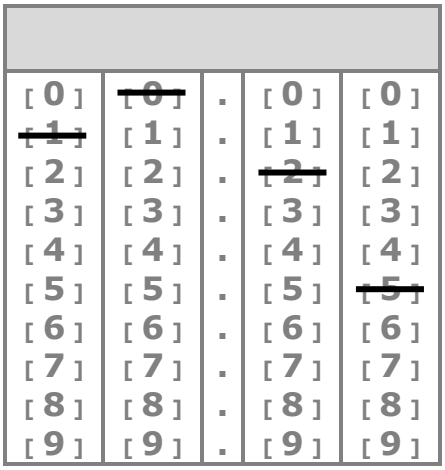

In the first example, on the left, a single-digit answer of 2 is marked.

In the second example, on the right, a 3-digit answer of 903 is marked.

A time answer would be given as a 4-digit answer like a 24-hour digital clock and a money answer would be given in pounds as a decimal number.

In the first example, on the left, an answer of quarter past 6 in the morning (06:15) is marked.

In the second example, on the right, an answer of 10 pounds and 25 pence (£10.25) is marked.

A line is drawn through each digit. It may go outside the brackets, but MUST NOT cross the outer border of the box.

2022-2023 Edition. This product is licensed solely for the personal and private use of Paloma De Sande, 32 Hollington Crescent, New Malden, KT3 6RR, paloma_de_sande@hotmail.com.
